

Spa Pool Fresh Water Start Up (Auckland town supply)

1. Add 1 cup full of Calcium Hardness Increase with filter running – wait 10 minutes
2. Add 1 – 1.5 cups of Total Alkalinity Increase with filter running – wait 10 minutes
3. Test pH and adjust as necessary using dessertspoon amounts – wait 10 minutes.
4. Add 2 teaspoons Spa Chlorine either Dichlor or Spa Care Chlorinating granules, with filter running – wait 10 minutes
5. Add 5 Bromine Tablets to dispenser in pool.

Weekly

1. Test water balance i.e.: alkalinity, pH and chlorine and adjust if necessary
 - If pH is high, add pH Decrease
 - If pH is low, add pH Increase
 - If pH and alkalinity are low, add Total Alkalinity

Fortnightly

1. Check cartridge filter is clean if required
2. Back wash and rinse filter and check pump basket for leaves

Every 6 – 8 weeks

1. Change the water (depending on use)

2. Clean cartridge with cartridge cleaner and deaerater
