

Eco Chlorinator

auto self cleaning

A compact
fully sealed design
built for
Australian
conditions

Auto self cleaning. Suitable for Mineral, Magnesium & Sodium Salt pools.
Recommended 3500 - 4000PPM.

- Easy to operate Analog Timer complete with internal re-charging Ni-Mh battery backup
- Self cleaning cell
- Automatic safety power reduction when salt high
- Proven high quality cell material
- 10 Increment LED display for accurate chlorine control
- Smart embedded micro-controller
- Works with any 230/240V Pump
- Stainless grade 304 mounting bracket with quick release pins
- Suitable for installation outdoors IP34 rated
- For pools between 35-55 m³

Long Life Cell

25% Longer cell life

†Automatic micro-computer technology so smart your pool will look after itself.

PROVEN TECHNOLOGY • EFFICIENT & RELIABLE • EASY TO OPERATE

Lincoln Chlorinator. Automatic Self Cleaning.

Chlorine Generation

Salt/mineral chlorination creates a soft, silky feeling in the water without using harsh chemicals. It's safer, healthier, easier to use and more economical. That's why it's the most popular method of pool sanitation in the world.

How It Works

Salt/minerals are added to the pool to achieve a level of 3,500ppm to 7,000ppm for salt or 3,500ppm to 4,000ppm for minerals. When this water passes through the chlorinator cell, electrolysis occurs, turning the salt/minerals into a chlorine gas which dissolves to become liquid chlorine.

The Micro-Computer

Intelligent yet simple. Using the latest digital technology, the micro-computer allows you to touch-in your commands and let the auto-pilot guide your pool through summer. The LCD back-lit display makes using the menu a breeze. Once you've entered your settings, the micro-computer will do the rest, managing the chlorine output in a range of climatic conditions.

Long Life Cell

The Lincoln chlorinator range has an extra-large cell and a lower current density. This means less load per cm² of cell plate, resulting in the cell lasting up to 25% longer.

Features

- Easy to use menu
- High salt/mineral indicator
- Smart micro-computer controller system
- Precision adjustment of chlorine output to 1%
- Back-lit digital LCD display
- Auto-pilot mode so you can sit back and relax
- Intuitive navigation buttons
- Automatic power reduction when salt or mineral level is too high
- Automatic self cleaning on all models
- Run dry pump protection
- Water temperature reading
- Salt/mineral level test function
- Super chlorinate mode for high use periods
- Backwash function for sand filters
- Spa mode setting: automatically resets chlorine output to 10%
- Super capacitor backup on timer, (no batteries to replace)
- Cell can be installed in either vertical or horizontal position

Model	Chlorine production grams per hour	Max pool size
SPLESC20	20	55,000L
SPLESC30	30	75,000L
SPLESC50	50	120,000L
