

# SAFETY DATA SHEET

#### Section 1: Identification of the Substance/Mixture and of Supplier

| Product name: |
|---------------|
|---------------|

#### STAIN AND SCALE

| Recommended use:     | Controlling stains and scale build up in swimming pools |
|----------------------|---|
| Supplier:            | Space Industries Limited                                |
| Street Address:      | 160 Plunket Ave,  |
|                      | Wiri, Auckland  |
|                      | New Zealand   |
| Telephone Number:    | + 64 9 262 3902   |
| Facsimile:           | + 64 9 262 3948   |
| E-mail:              | orders@spaceindustries.co.nz                            |
| Website:             | www.spaceindustries.co.nz                               |
| Emergency Telephone  | 0800 764 766 (all hours)                                |
| Date of preparation: | March 2021  |

# Section 3: Composition/information on ingredients Product Description: Controlling stains and scale build up in swimming pools

Hazardous Component(s): CAS Number Proportion Risk Phrases Controlling stains and scale build up in swimming pools PHOSPHONIC ACID 6419-19-8 <50% R34, R41

| Section 4: First Aid Measures |   |                           |
|-------------------------------|---|---------------------------|
|                               | Show this Safety Data Sheet to a Doctor   |                           |
| Inhalation:                   | Remove to fresh air. If not breathing seek medical attention.   |                           |
| Skin Contact:                 | Remove/take off immediately all contaminated clothing. Rinse Wash contaminated clothing before reuse.                     | e skin with water/shower. |
| Eye Contact:                  | Irrigate eyes with generous quantities of water for 15 minutes present and easy to do. Seek immediate medical assistance. |                           |
| Ingestion:                    | Remove product from mouth. DO NOT induce vomiting. Give   | e a glass of water to     |
| Stain and Scale               | Page 1 of 4   | March 2021                |

# SAFETY DATA SHEET

effectively dilute the product. Seek immediate medical attention.

Notes for the Doctor:

Treat symptomatically.

For advice, contact the Poisons Information Centre 0800 764 766 or a doctor

| Section 5: Fire Fighting Measures |   |
|-----------------------------------|---|
| Specific Hazards:                 | This is non-flammable, but in a large fire will decompose when water has boiled off, producing phosphine. This is a highly flammable and very toxic gas. Phosphorus oxide fumes may also be produced. |
| Suitable Extinguishing<br>Media:  | Extinguish fires with water spray, foam, carbon dioxide or dry chemical powder.   |
| Fire-fighting advice:             | Keep containers cool by spraying with water to prevent build-up and drum bursting.  |
|                                   | Fire fighters should wear a self contained breathing apparatus to minimise risk of exposure to vapour or products of combustion.  |

| Section 6: Accidental Release Measures                |   |
|---|---|
| Emergency Procedures                                  | Avoid accidents, clean up immediately. Ensure adequate ventilation. Wear protective equipment to prevent skin and eye contamination.  |
| Methods and Materials for<br>Containment and Clean Up | Dike and neutralize with soda ash. Absorb with dry earth, sand or other similar material, shovel up and dispose of in an area approved by local authority by-laws. May be safely mopped up and area washed with excess water. Prevent run-offs into drains and waterways. |

|                       | Section 7: Handling and Storage  |
|-----------------------|--|
| Handling:<br>Storage: | <ul> <li>Use in a well ventiliated area, a suitable respiratory device should be worn if mist generation is significant.</li> <li>Remove drum bung slowly to release any internal pressure.</li> <li>Ensure an eye bath is available and ready for use.</li> <li>Observe good personal hygiene practices and recommended procedures.</li> <li>Wash hands thoroughly after handling.</li> <li>Do not eat, drink or smoke when using this product.</li> <li>Store away from foodstuffs.</li> <li>Avoid eye and skin contact.</li> <li>Store in a cool, dry place away from alkalis, poisons, foodstuffs and oxidising agents (eg chlorates and nitrates).</li> <li>Corrosive to most metals</li> <li>Keep containers tightly closed when not in use.</li> <li>Inspect regularly for deficiencies such as damage or leaks.</li> <li>Protect against physical damage.</li> </ul> |

| Section 8: Exposure Controls/Personal Protection |  |
|--|--|
| Occupational Exposure<br>Limits:                 | No value assigned for this specific material by the New Zealand Occupational Safety and Health Service (OSH).  |
| Engineering Control<br>Measures:                 | Use in a well ventilated area, a suitable respiratory device should be worn if mist generation is significant. |
|  |  |

SAFETY DATA SHEET

| Personal Protective<br>Equipment: | Avoid contact.<br>Protective clothing.<br>Full face shield or close fitting goggles.<br>PVC or rubber gloves<br>Respirator suitable for use with mists and aerosols. |
|-----------------------------------|--|
|                                   |  |

| Section 9: Physical and Chemical Properties |                           |  |
|---|---------------------------|--|
| Physical state:                             | Liquid                    |  |
| Colour:                                     | Clear                     |  |
| Boling/melting Point:                       | No information available  |  |
| Specific Gravity/Bulk                       | S.G. 1.15 @ 25°C          |  |
| Vapour Pressure:                            | No information available. |  |
| Flash Point (°C):                           | No information available. |  |
| Percent Volatilise:                         | 50% (water)               |  |
| Flammability Limits:                        | No information available. |  |
| Autoignition Temperature:                   | No information available. |  |

| Section 10: Stability and Reactivity |  |
|--------------------------------------|--|
| Stability:                           | Product is stable under normal conditions of use, storage and temperature.   |
| Conditions to Avoid                  | Corrosive to most metals (eg mild steel, aluminium) and will attack them to liberate hydrogen, a flammable potentially explosive gas.  |
| Hazardous Decomposition<br>Products: | This is non-flammable, but in a large fire will decompose when water has boiled off, producing phosphine. This is a highly flammable and very toxic gas. Phosphorus oxide fumes may also be produced |

|               | Section 11: Toxicological Information   |
|---------------|---|
| Ingestion:    | Irritating and corrosive to all tissues. Ingestion can result in nausea, vomiting and abdominal pain<br>Acute oral LD50 in rats >10g/kg |
| Eye contact:  | Severe eye irritant. Can cause burns and eye injury.  |
| Skin contact: | The product is corrosive to the skin causing irritation and burns.  |
| Inhalation:   | Mist is very irritant to the respiratory tract.   |

| Section 12: Ecological Information |   |
|------------------------------------|---|
| Environmental fate,                | Avoid contaminating waterways.  |
| persistence and                    | High concentrations in receiving waters will harm aquatic life due to the effect of low pH. |
| degradation:                       |   |

# Section 13: Disposal Considerations

• Recycle wherever possible.

• Consult approved Waste Management Company for disposal options.
