

ALPHA DUAL SPEED POOL PUMP

BAD BOY

When it's Bad, it's Better

LOW NOISE
38dB
@ low speed

Pools create a lot of joy for families and friends. But they can cost a lot to maintain. Using a 2 speed pump cuts down on power consumption by up to 25% (335KW) per annum. That could mean within 5 years the pump has almost totally paid for itself.

(120lpm / 0.25kW/h X 13hrs/pd @ \$0.26)

Reduce power consumption by up to 25% per annum

The other great benefit is LOW NOISE! Running at low speed the pump drops to below 38dB about the same as being in a library. A single pump runs at over 50dB which is like being back in the office. It's good for your head space and the next door neighbour.

How to use a 2 speed pump;
Use low speed for daily filtration
Use high speed for;
Pool Vacuuming
Pool back-washing & discharge
Mixing & dispersion of chemicals
During or after high bather load

Super Economical & Quiet

Maintain your dual speed pump in the same way you would a single speed version. Before installing, ensure the low speed pump metrics suit the L/max & Q/max properties of your particular pool. Installations, where the pump site is above pool level “must” have a non-return fitting in the in-line.

-  Stainless steel shaft - ideal for salt water pools
-  Glass filled poly-propylene construction for strength with high UV protection
-  Mechanical seal - carbon ceramic for reliable performance and durability.
-  Bearings sourced from the best, TPI-Taiwan
-  Large leaf basket with clear view lid

-  Complies with AS/NZS60335.1 & AS/NZS60335.2.41
-  High speed/low speed switch in-built

-  Fitting unions - 40mm & 50mm
-  Suction end 1.5m (on high speed)
